PERSONAL STATEMENT

Formerly working in a family-run business, now I am on a pathway to pursue a career in the tech industry. Also, as a tech enthusiast, I am keen in fast-paced technological changes with an eager to learn to improve myself with new challenges all the time.

PROJECT

Fit Venger	This project about track or keep your activities to website. We use the CSS, JavaScript, ReactJs, MongoDB to build this website.
Jamming	One of the project about API. I study about react and create this website from react and use API to save playlist to Spotify and anybody who have I access to use it they can use my playlist in Spotify application.
Find my hat!	In this project I use language Javascript to create a game resemble pac-man. You can choose your direction to walk in the map to complete the
Colmar academy	This is my first project with HTML and CSS. This was hard for me to start but I can pass it. I've learn a lot!
